Labour Weekly Clockings Report

Labour Weekly Clockings Report:

- The Weekly Clockings report presents by employee the clockings on each individual day in the current week.
- Start, finish and break times (when clocked) will all present.
- Daily hours are summed on the vertical columns and individual employee weekly hours are summed on the horizontal columns.
- A very useful report where unbalanced clockings can be easily identified.
- An unbalanced employee will result in the vertical column for that day to present at a much higher number (usually 6 digits)
